

## **REMIND APP**

### **What is it?**

**The Remind App is a FREE service that provides a safe way for teachers/coaches to text message or email parents/students. Using the Remind App, teachers/coaches can communicate with parents/students more effectively without needing to know their phone number and without having to give their phone numbers out.**

### **How does it work?**

**First, a coach adds his/her team, which generates a unique code. The coach then shares that code with the parents/students. At that point, any parent/student who sends a text message with the code will be “subscribed” to the coaches class. Any time a coach sends a message from the Remind App, parents/students who are subscribed will receive it. Parents/students are able to receive important reminders from the teacher without jeopardizing privacy by sharing cell numbers.**

**Remember, though, that the Remind App will be a message from the coaches Remind App account so you will not be able to reply. If you need to speak to the coach at any time, please email them directly.**
